

Agile Software Development With SCRUM HDT820 Three Days

Prerequisites

Students should have experience as a software developer. Knowledge of any software development methodology is good. Knowledge of Agile SCRUM and Extreme Programming techniques is even better.

Who Should Attend

This course is targeted at software developers, users, project managers and any other people who need to develop software.

Course Description

This course provides students with the skills necessary to design and implement software applications using Agile Scrum and Extreme Programming techniques. Agile Software Development with SCRUM is based on the following book: Agile Software Development With SCRUM by Ken Schwaber and Mike Beedle, published by Microsoft Press on October 21, 2001, ISBN: 0130676349.
